

IN THE CLAIMS

Claims 1-23 were previously cancelled. Claims 24, 26-35 and 37-40 are currently cancelled. Claims 25, 36 and 41-43 have been amended, all as follows.

Claims 1-24 (Cancelled)

25. (Currently Amended) A processing device of a web-fed printing press comprising:
 - at least first and second unreeling devices~~roll changers~~ adapted to unwind previously imprinted rewound webs of material;
 - a separate position-controlled electric drive mechanism for each said unreeling device~~roll changers~~;
 - a control device adapted to control said electric drive mechanisms for each of said unreeling devices~~roll changers~~ to maintain registration of said unwound, previously imprinted and rewound webs of material as said previously imprinted rewound webs of material are unwound by said unreeling devices~~roll changers~~;
 - a draw-in unit arranged downstream, in a direction of web travel, of each said unreeling device~~roll changer~~;
 - a longitudinal web cutting device arranged directly after each said draw-in unit in said direction of web travel;
 - a turning bar arrangement located after said longitudinal web cutting device; and
 - at least one former, at least one transverse cutting device and at least one transverse folder after said turning bar arrangement and adapted to produce a printed

product from said unwound, previously imprinted, rewound webs from said at least first and second unreeling devices.

26-35. (Cancelled)

36. (Currently Amended) The processing device of claim 25 wherein said at least one former is centered on an uncut one of said unwound, previously imprinted, rewound webs of material web, and a second former, said second former being is centered on a partial unwound, previously imprinted, rewound web of material cut by said longitudinal web cutting device.

37-40. (Cancelled)

41. (Currently Amended) The processing device of claim 25 wherein said web-fed printing press is a 16-page printing press.

42. (Currently Amended) The processing device of claim 25 wherein said printed product produced from said unwound, previously imprinted, rewound webs has 32 pages.

43. (Currently Amended) The processing device of claim 25 wherein said web-fed printing press is a jobbing printing press.
